

1991 Volvo 940 SE Estate

£995.00

I purchased this Volvo from the previous owner's widow whose husband had sadly died some 12 months ago. Having been his pride and joy I promised I would re-commission the vehicle and not break it for spares. So although the Volvo had had little use for some time, with the addition of a new battery the Volvo started on the key and I was able to drive it the 10 miles back to my workshop. Apart from having to replace a seized front brake caliper slider and the rear brake pads it required only an intermediate service and a good valet. A good testimony to Volvo's reputable build quality and ability to cover high mileages.

Although the Volvo has covered 193,000 miles in its 18 year life it appears to have always been well cared for and maintained although I have not managed to trace a full service history due to the age of the vehicle. The clutch & spigot bearing were replaced at 191,000 miles and it had a full service carried out at 192,000

miles. The Volvo has just had an intermediate service carried out in our on site workshop which also included the replacement of rear brake pads and H.T. leads. The Volvo has also just had its cam belt replaced at a local independent garage.

Condition wise the Volvo is in exceptionally good condition given its age and mileage as can be seen in the photographs. Externally there are a few minor blemishes and stone chips, these have all been touched up where possible and they do not detract from the overall look or usability of the car. Internally the leather upholstery is in excellent condition with no rips or tears and has a lovely worn patina. All the plastic trim is in excellent condition and everything is present and correct including the original tool kit, hand books etc. The Volvo has been tastefully modified at some point in its life with the addition of multi-spoke alloy wheels with low profile tyres, grey leather

seats and the colour coding of the bumpers, door mirrors and bump strips.

Additional extras include, 111bhp fuel injected 4 cylinder engine, 5 speed manual gearbox; 4x electric windows, electric mirrors, electric sunroof, original radio cassette; central locking with 2 keys, power steering, 15" lattice alloy wheels inc. spare, grey leather interior, 60/40 split rear seats, carpet mats, colour coded bumpers mirrors and trims, tow bar with single point electrics.

For the full asking price the vehicle will come with a new 12 month M.O.T and a 6 month Silver Plus Warranty (details available on request). This vehicle is not affected by the emission related tax premiums and will currently cost £190.00 a year to tax.
